WORK EXPERIENCE

	Remote
Huzzle <i>Product Manager</i>	<i>Apr 2024 - Present</i>
- Optimized the talent sourcing pipeline by integrating AI-driven profile-matching tools, resulting in a 62% increase in placement rate (from 47% to 76%) and expanding active deals from 112 to 149, contributing to a pipeline growth of £76K (from £166K to £242K). - Led cross-functional collaboration with Engineering to develop and implement AI-based interview question generation, reducing time-to-place from 24 to 15 days and increasing monthly recurring revenue (MRR) by 48.8%, adding £24.8K (from £50.8K to £75.6K). - Managed expansion into five regional markets—Philippines, South Africa, Pakistan, Latin America, and Eastern Europe—facilitating the placement of talent for over 200 UK/US/EU employers across two-sided marketplace activities, boosting international placements by 35%.	
Zistre <i>Head of Product</i>	Bangalore, India <i>Jan 2020 - Feb 2024</i>
- Scaled a zero-capital test-prep platform to over 100,000 users across 60+ countries, achieving approximately \$200K in annual recurring revenue and maintaining a 4.2-star average rating, while driving nearly 35% of new user acquisitions through referrals. - Implemented targeted PPP-based pricing tiers across 20+ countries, resulting in a 50% global increase in conversion rates and a 2.3x boost in India, without reducing lifetime value, by aligning prices with local income levels and ensuring high-quality user engagement. - Redesigned the free trial funnel to prioritize early value delivery, leading to a significant improvement in trial-to-paid conversions—upward of 30%—by testing variants on content length, difficulty, and feedback timing, thereby establishing a scalable roadmap for checkout and refund processes.	
Go Digital Lab <i>Founder & Head of Operations</i>	Bangalore, India <i>Oct 2016 - Dec 2019</i>
- Established and expanded a B2B services agency, securing over 50 clients across India, USA, and Europe, including multiple public limited companies, resulting in a 60% client retention rate. - Spearheaded the development of tailored web and app solutions, increasing client digital engagement by an average of 40% through innovative data visualization dashboards, Google Ads campaigns, and comprehensive Google Analytics integrations. - Optimized marketing funnels for educational campaigns by redesigning landing pages based on real-time funnel analytics, achieving a 3.3× increase in conversion rates from 1.5% to 5%, and enabling clients to surpass their admissions targets by up to 20% ahead of schedule.	
Cognizant <i>Programmer Analyst Trainee</i>	Bangalore, India <i>Jul 2014 - Aug 2015</i>
- Completed intensive hands-on training in C, C++, SQL, DBMS, and Java, gaining a strong foundation in programming and database management. - Conducted research on the latest releases of Software AG products, staying updated with emerging technologies and trends.
